

City Wide of Boston

Client Testimonials

"I was on the phone with a client going over our Facility Response Plan and she was blown away by the amount of information she was unaware of. With the guidance and resources that I have been given from the City Wide Task Force, I was able to help support her on things she can do in the common areas of their buildings, as well as guidance on how to handle the kitchen and cafeteria. The most important part was the ability to provide her with the posters to hang though out the building. Even more important was providing her with the control plan as she was unaware this needed to be done. She has made it clear that without City Wide of Boston she would be lost. "

"My contact was getting pressure from her boss to come up with a plan and information regarding COVID-19. I sent an email with the links to the CDC and OSHA and assurance that we can help them ensure the facility is safe and ready to open. When she sent the information to her boss, they were put at ease about reopening their facility."

"We managed an electrostatic disinfectant service where my contact had called at 9:00am and we had a crew there by 10:30am. She was very appreciative not only for our response time but for our knowledge of what to do in this situation."

"Our client expressed to me their overwhelming gratitude regarding a project we were able to manage for them at the last minute. They had investors coming to look at the newly re-modeled portion of their lab and they needed help moving items from their 10,000 square foot storage room. We were able to find a contractor to get a team of movers with two trucks and completely move this storeroom across town within two days. "

"Whenever something comes up my contact will reach out to me to see if I can assist in managing the service for them. My contact appreciates the time that I save them from having to find contractors himself. Over the past few years we have been able to find multiple contractors to manage the following projects in their facility "

- Electrical work
- Fire suppression
- Parking lot
- Roofing
- Fencing
- Lead removal
- Painting
- Heating system
- Snow plowing
- General Construction

"My client has recently moved their facility and had forgotten to do a clean of their previous facility. They had a showing of the facility in the morning and reached out to City Wide and we were able to find a contractor to prep for the showing first thing in the morning. My client was able to show the building later that day and was impressed at how fast I was able to get a contractor on site on such short notice."
